

Srishti Shaw

Software Engineer (Java Backend)

Bengaluru, India — Open to PAN India Relocation

shawsrishti61@gmail.com | +91 7603081767 | LinkedIn | GitHub

Professional Summary

Java Backend Developer with hands-on experience building RESTful web applications using Core Java, Spring Boot, Hibernate, JDBC, and MySQL. Designed and deployed 10+ APIs supporting structured CRUD operations and role-based authentication. Improved backend performance by up to 25% through indexing and optimized SQL queries. Strong foundation in OOP, database design, and scalable backend architecture.

Technical Skills

Programming Languages: Java, SQL, JavaScript

Core Concepts: OOP, Data Structures, Algorithms, Exception Handling, Multithreading (Basics)

Backend: JDBC, Servlets, Hibernate, Spring, Spring MVC, Spring Boot, REST APIs

Frontend: HTML5, CSS3, JavaScript, React.js

Databases: MySQL, PostgreSQL, Relational Database Design, CRUD Operations

Tools: Git, GitHub, Postman, Eclipse, VS Code

Methodologies: SDLC, Agile, Debugging, Unit Testing

Projects

ChikitshaSpace – Secure Healthcare Data Management System

- Engineered backend modules using Spring Boot managing 500+ patient and doctor records across 3 user roles.
- Designed and exposed 12 REST APIs with role-based authentication improving secure data access control.
- Structured normalized MySQL schema reducing redundant storage by 20% and improving query response time by 18%.
- Implemented centralized exception handling reducing application runtime failures by 30%.

Supermarket Management System — Java, JDBC, MySQL

- Architected a database-driven system handling 200+ product records and automated billing workflows.
- Integrated JDBC with MySQL enabling 100% CRUD functionality for inventory and customer management.
- Optimized SQL queries and indexing improving query performance by 15%.
- Applied transaction management reducing billing inconsistencies and data errors.

Product Management System — React.js, JavaScript

- Developed a responsive product management interface supporting 4 core operations (Add, Update, Delete, Search).
- Implemented React Hooks for state management improving UI responsiveness by 20%.
- Reduced duplicate UI logic by 30% using reusable component-based architecture.

Tic Tac Toe Game — React.js, JavaScript

- Built an interactive game with automated winner detection and real-time UI updates.
- Structured modular components improving maintainability and reducing redundant state handling.

Education

Java Full Stack Development Training (JSpiders)

Jun 2025 – Feb 2026

B.Tech in Information Technology

Oct 2021 – Jul 2025

JIS College of Engineering, West Bengal

CGPA: 8.1

Higher Secondary (Science)

Jul 2018 – Mar 2020

Jagatdal Chashma-i-Rahmat High School, West Bengal

Score: 84.2%

Achievements

- Patent and paper publication for **ChikitshaSpace – Secure Healthcare Data Management System**.
- Secured **3rd Position** among 50+ teams in Smart India Hackathon (SIH).

Core Competencies

Backend Development • REST API Design • Database Optimization • Debugging • Code Optimization • Agile Collaboration
